

MEET

BETSY

THE HAVENS HOSPICES
BUTTERFLY

Why does a butterfly represent hospice care?

The 'butterfly effect' means that very small actions (like a butterfly flapping its wings) can have a big impact in places far away

In hospices like Fair Havens and Little Havens the small actions of the nurses and volunteers can have a dramatic effect on the quality of life and happiness of the babies, children, teenagers and adults we care for

A butterfly is also a beautiful fragile creature, just like many of those we care for

**EVERY BUTTERFLY
MAKING EVERY
DAY COUNT**
